1. _____

The Life Cycle of a Butterfly

2. _____

Butterflies are amazing insects that go through a process called metamorphosis. During this process, they change from an egg to a caterpillar, then to a chrysalis, and finally into an adult butterfly. Each stage is important for the butterfly to grow and survive.

DID YOU KNOW?

There are over 17,000 different species of butterflies around the world! They can be found on every continent except Antarctica.

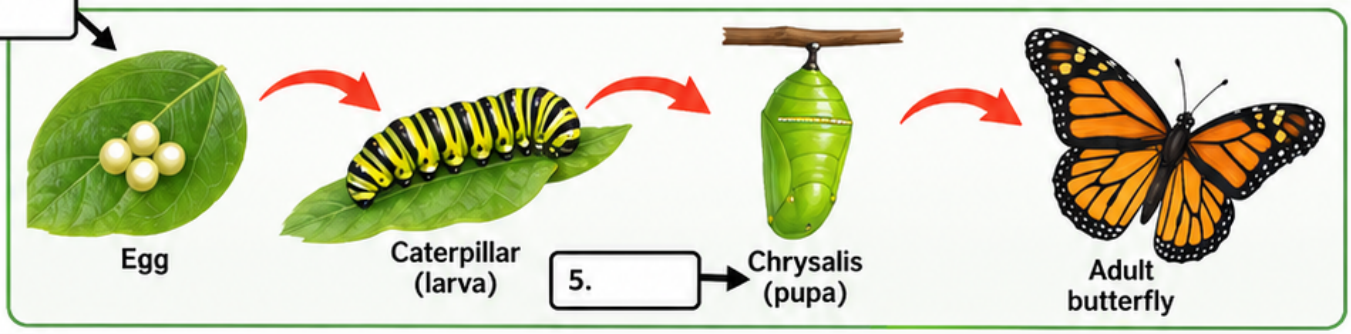

3. _____

The Four Stages

A butterfly's life cycle has four main stages, as shown in the diagram below.

4. _____

6. _____

What Do They Eat?

Caterpillars eat leaves, especially from milkweed plants. Adult butterflies drink nectar from flowers. The nectar gives them energy to fly and lay eggs.
